Bowen Deng

PhD Candidate · AI for Chemistry & Materials

bowen.deng@chimieparistech.psl.eu | Paris, France | Google Scholar | github.com/BonedDeng | LinkedIn | @DDBONED1

RESEARCH INTERESTS

Machine learning for chemistry and materials science: learning across molecular representations — 1D sequences (SMILES), 2D molecular graphs, and 3D geometry — with sequence models, graph neural networks, and machine-learned interatomic potentials, for reaction discovery, thermochemistry, and molecular / materials property prediction. Also interested in computer vision (human action recognition) and large language models.

EDUCATION

Ph.D. in Chemistry / Machine Learning 2023 – 2026 (expected)
Chimie ParisTech – Université PSL, Paris, France
Advisor: Dr. Thijs Stuyver. Thesis: AI for chemistry & materials (molecular representation learning, MLIPs, thermochemistry, reaction discovery).

M.Sc. in Materials and Chemical Engineering 2020 – 2023
Guangxi University, Nanning, China
Advisor: Prof. Shuangliang Zhao.

B.Eng. in Computer Science and Technology 2016 – 2020
Southwest University of Science and Technology, Mianyang, China
Double degree: second B.Eng. in Materials Science and Engineering.

RESEARCH EXPERIENCE

Research Intern — Computer Vision (Human Action Recognition) 2022
Institute of Automation, Chinese Academy of Sciences (CASIA)
With Dr. Dongchang Liu. Developed a fast MLP-based temporal action detection model (TadML).

AWARDS & HONORS

Kaggle Competitions Silver Medal ×3 — Competitions Expert 2021–2022
Google Brain – Ventilator Pressure Prediction (2021);
Hungry Geese (2021);
Feedback Prize – Evaluating Student Writing (2022)

ACADEMIC SERVICE

Reviewer for *The Journal of Physical Chemistry Letters*, *Digital Discovery*, and ACDSA 2027 (IEEE).

TECHNICAL SKILLS

Programming	Python, C/C++, CUDA, Triton
ML / DL	PyTorch, PyTorch Geometric, e3nn, graph neural networks, machine-learned interatomic potentials, transformers
Cheminformatics	RDKit, SMILES, high-throughput reaction profiling, quasi-RRHO thermochemistry
Comp. chemistry	Gaussian, ORCA, VASP, CP2K, LAMMPS, xTB (DFT / ab initio / MD)
Tooling	Git, Linux, SLURM / HPC clusters
Languages	Chinese (native), English (fluent)
